Functional & Performance Testing

Date	12-06-2026
Team ID	
Project Name	**Voice-Based Concept Understanding Analyser**
Maximum Marks	5 Marks

Functional & Performance Testing

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	User Login & Registration	Register and log in with valid and invalid credentials	Valid users can access the system; invalid users receive an error	System behaved as expected	Pass
FT-02	Voice Upload Validation	Upload supported and unsupported audio files	Valid audio files are accepted; invalid formats are rejected	Audio validation worked correctly	Pass
FT-03	Speech-to-Text Generation	Upload a voice response for transcription	Audio is accurately converted into text	Transcript generated successfully	Pass
FT-04	AI Evaluation & Feedback	Submit a voice response for assessment	Semantic score and personalised feedback are generated	Feedback generated successfully	Pass
FT-01	Response Time Test	Measure time from upload to result generation	Results generated within 3 seconds (excluding API delay)	Average response time: 2.7 seconds	Pass
FT-02	Concurrent Request Test	Submit multiple evaluation requests simultaneously	System handles multiple requests without failure	Stable performance observed	Pass

FT-03	PDF Report Generation	Generate and download evaluation report	PDF report is created and downloaded successfully	Report generated successfully	Pass
